

CRANE FORKS

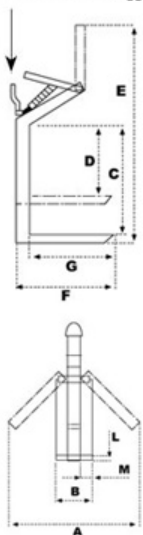

Automatic crane fork with self levelling ends

MBA-A

We proudly present you our MBA-A series. The product is designed and manufactured using high quality steel to guarantee strength and safety in the workplace. The fork offers automatic compensation and adjustment of the center of gravity depending on the weight of the load. You can lift loads weighing up to 3000 Kg depending on the fork dimensions you choose (see the table below). It can easily adapt to different weights, width and different types of loads. The closing lock is operated and controlled by means of a hand-wheel. We offer a wide range of fork models, you can check them on the main menu or see them in action in our photo gallery. All our forks are built to meet or exceed the regulations of ECC UNI-EN and ASME and come with the required labels, certificates and user and maintenance manual. All our products are covered by a 1-year warranty (EU Directive).
